EXAMINER'S AMENDMENT

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 27-59 which are non-elected without traverse. Accordingly, claims 27-59 have been cancelled.

The application has been amended as follows:

- Cancel Claims 27-59.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification and remarks filed September 12, 2005, the prior art of record fails to specifically disclose or render obvious a projection system comprising, in particular, at least one of the plurality of light-producing portions having a first oblique anisotropic compensation element adjacent to the first panel and being operable with the projection lens to provide an azimuthally averaged, improved contrast image upon the display surface relative to an uncompensated image as recited in independent claims 1 and 60. Although Aritake (U.S. 6,478,429), Van De Witte (U.S.

5,978,055), Gilmour (U.S. 6,122,028), Sonehara (U.S. 5,105,289), and Sekiguchi (U.S. 5,798,864) discloses either similar projection systems or compensator elements, none of the reference discloses a projection system comprising, in particular, at least one of the plurality of light-producing portions having a first oblique anisotropic compensation element adjacent to the first panel and being operable with the projection lens to provide an azimuthally averaged, improved contrast image upon the display surface relative to an uncompensated image. Furthermore, the references fail to specifically disclose a compensation scheme to improve the azimuth-averaged contrast requirements that is otherwise restricted in direct viewing systems, whose azimuth-averaged contrast is concerned with view angle and symmetry, which is of little or no concern in the projection context of the claimed invention. As a result, allowance is proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
